

AI Mortgage Advisory Agent

Conversational guidance from a borrower's first question to a clear, compliant recommendation.

Self-serve mortgage guidance, on demand

Prospective borrowers face a confusing maze of loan types, rates, and eligibility rules — and loan officers spend hours answering the same early-stage questions before a lead is even qualified.

The Mortgage Advisory Agent is a conversational assistant that interviews the borrower, looks up live product data, and returns a personalized recommendation — product, term, and likely rate — in minutes, then routes qualified leads to a licensed officer to close.

to a tailored recommendation

24/7

always-on first-touch advisor

From conversation to recommendation

What the agent does

Conversational intake

Scan-first questioning collects the borrower profile in just a few turns.

Live rate lookup

Pulls product rates and rules from the Rate Card — never invents a number.

Eligibility screening

Checks credit, down payment, LTV and DTI against each product's limits.

Affordability math

Computes monthly payment, full PITI, LTV and front / back-end DTI.

Goal-based recommendation

Best product, term and rate for the borrower's priority, with alternatives.

Compliant handoff

Fair-lending guardrails, clear disclaimers, routing to a licensed officer.

Value on both sides

For borrowers

- Instant, plain-language clarity on options
- Personalized recommendations, not generic info
- Available any time — no waiting for a callback
- Confidence and a plan before talking to a lender

For the business

- Faster lead qualification and higher conversion
- Consistent, compliant first-touch advice at scale
- Lower cost per inquiry; scales on demand
- Officers spend time closing, not on triage

Built for a regulated process

Fair lending (ECOA)

Recommendations use only objective financials — protected attributes are never collected or used.

Not an offer

Figures are estimates; APR differs from the note rate; nothing is a commitment to lend.

Privacy by design

No SSNs or documents in chat; data is minimized and passed to secure, human-handled channels.

Human in the loop

The agent advises; a licensed officer verifies, pre-approves and locks the rate.

ROADMAP

Crawl. Walk. Run.

01

CRAWL

Guided estimator embedded on the site, an illustrative rate card, and instant recommendations.

02

WALK

Live rate / lender API feed, CRM handoff and lead scoring, plus analytics on borrower drop-off.

03

RUN

Full pre-approval orchestration, document intake, and multi-market, multi-lender support.

Let's put it in front of your borrowers.
